Special visit to an important ancient Shinto shrine and over 150 items of cultural importance

Iwashimizu Hachimangu Shrine lies in the mountains of Otokoyama where calls of wild birds reverberate in the air. This tour brings you away from the hustle and bustle of Kyoto city to an ancient Shinto shrine that is also one of Japan's designated national treasures. We will explore its shrine halls that were constructed 300 to 400 years ago, guided by a priest who will tell us more about the shrine's history. Before leaving, we will receive an "ema" (a wooden plaque for writing one's prayers or wishes) with the shrine's unique design as a souvenir from our visit.

Named after the holy water ("iwashimizu") flowing from the midsection of Mt. Otokoyama, Iwashimizu Hachimangu Shrine is one of Japan's three major Hachimangu shrines, along with Usa Jingu Shrine in Kyushu and Tsurugaoka Hachimangu Shrine in Kanto.

The shrine grounds are home to several sites of tremendous historical importance, including numerous cultural treasures dating from more than 1000 years ago that have been carefully preserved and handed down through the generations.

More than 150 stunning engravings showcasing the shrine's magnificence in vivid colors can be found on the fence paneling that surrounds the shrine's main hall. We will learn more about these decorative works from the priest during the guided tour.

The stone paved approach connecting the third torii gate to the main hall. In the vicinity of the third torii gate, we will find a protruding rock called "Shobuishi" where we will gather together to pray.

Once a year in spring, the shrine welcomes visitors at night. During this special event, the main hall will be illuminated and open to the public, with many important cultural assets on display. Activities such as guided tours of the hall and open-air tea ceremonies will also be held.

Experience the heart of Japanese tea culture amidst the beautiful seasonal scenery of the surrounding garden

"Shokado Bento," a boxed lunch that exemplifies Japanese cuisine, has its roots in "Shokado"—a residential complex where high-ranking monks in the past have spent the last years of their lives in the company of sprawling gardens with the occasional tea room or study. This tour brings you to "Shokado," where you will sit down for a tea ceremony. Immerse yourself in this rich cultural experience while enjoying the beautiful seasonal scenery of the surrounding garden.

Shokado Garden shares a deep affinity with the Buddhist priest Shokado Shoji, who was active in the early Edo period as a leading figure of the elegant Kan'ei culture. This garden houses a number of culturally important sites within its huge area of 22,000 square meters, including the tea hut "Shokado" and an ancient study "Izumibo Shoin," which combine with the surrounding Japanese gardens to create a stunning landscape.

When seated in the "Bai-in," you can hear the enchanting sounds of water drops emanating from the nearby "Suikinkutsu" (water lyre cave) beside a stone wash basin. As the seasons go by, the garden offers refreshing views of camellia, plum blossoms, cherry blossoms, and maple leaves.

We will sit down for a formal tea ceremony in the tea room "Chiku-in." All beginners are welcome to participate and enjoy this essential cultural experience.

Shokado Garden is the birthplace of the well-known Shokado Bento, a mainstay in Japanese cuisine. You can enjoy your lunch while taking in the delightful backdrop of the surrounding garden.

The collection at Shokado Art Museum features many works related to Shokado Shoji. The museum also regularly holds special exhibitions and themed exhibitions. You can contact them for more details.

Experience tea harvesting at a tea plantation, and savor green tea of the highest quality at a tea factory

This tour offers a complete tea experience that is also popular with tourists on sites like TripAdvisor. We will tour a plantation along Kizugawa river known for cultivating high-quality tea leaves, where we will harvest tea by hand. After that, we will visit a tea factory and savor the exceptional taste of high-quality green tea that is made using techniques unique to this area. This tour allows you to experience something so rare that it eludes even most native Japanese people.

Joyo City is one of the few regions nationwide that cultivate Tencha—tea leaves that are ground into fine powder to produce matcha. At the National Tea Fair where the quality of different matcha is judged, Joyo City has twice beaten other tea-producing regions to the top prize (in 2015 and 2017). Magouemon owns many tea fields and tea factories in this prime region that has the perfect conditions for tea cultivation.

Tencha grown near the dried riverbed of Kizugawa river is known as "Hama-cha," a premium variant that is highly prized by tea wholesalers. We will tour the tea plantations and harvest tea leaves by hand. Cancelled in case of rain.

We will then visit one of the very few Tencha factories in Japan to witness how freshly picked tea leaves are processed to make matcha powder.

We will savor the taste of high-quality green tea made by the "Honzu method," a tea processing technique unique to this region. The matcha's bright green color, elegant aroma, and profound depth of flavor attest to the unmatched quality of the tea.

When matcha is served during the tea ceremony, there will be a short talk on Magouemon's method of preparing matcha. You will also get to try making matcha yourself.

●Shuon-an Ikkyu-ji Temple

A temple with a Japanese rock garden where the monk Ikkyu spent his last years.

●Omido Kannon-ji Temple

A temple where you can see the eleven Kannon statues and receive many divine blessings.

●Kaijusen-ji Temple

The 17.7m tall five-storey pagoda, the only one built during the Kamakura period, is a national treasure which used to house statues of the four heavenly kings (the statues are currently entrusted to the Nara National Museum. The inside of the five-storey pagoda and the statues of the four heavenly kings are usually closed to the public.) The temple offers sweeping views across to Mt. Kongo and Mt. Katsuragi.

●Kunikyo Ruins

About 1300 years ago, Emperor Shomu ordered the construction of the Kuni-Kyo palace in Kizugawa, which briefly became the country's capital between 740 and 744. By visiting these ancient ruins, you are able to get a sense that this corner of Japan played a pivotal role in Japanese history.
